2007

SOILS AND ELEVATION 3,500 feet. La Consulta is predominantly

clay; La Consulta Altamira Vineyard is clay and sand; Vista Flores

is a combination of rocky, sand, and clay soils

WINEMAKER'S TASTING NOTES This wine shows very good color

depth, with outstanding red and violet nuances, characteristic of

Malbec. It amuses us with complex aromas of sweet red fruits and

floral fragrances like violets, typical of Malbec. The oak provided

delicate whiffs of vanilla and tobacco with a hint of white

chocolate that complete the aromatic richness. The first in-mouth

sensation comes from the sweetness with soft ripe tannins. The

texture and structure are worthy of this variety.
