WINE + BEER = WINEBEER?

Definitely **NOT**.

Winebeer is much more than the mixture of wine and beer. Winebeer is a new category of beverage that integrates wine, beer and sparkling wine processes.

These processes complement each other over a foundation of wine that has no need for artificial components. A unique product is achieved from the moment it's brewed to the moment it's packaged, and a joint effort with Cristalerías Chile created and produced an exclusive bottle for Winebeer.
